- Download MAMP from "mamp.info/en/downloads/"
  - MAMP & MAMP PRO 3.1.0 (Windows)
  - MAMP & MAMP PRO 3.4 (Mac OS X)

- Run the install for either Macintosh or Windows computer
  - Select Language
  - Toggle MAMP Pro to no checkmark
  - Set the MAMP directory
    - We recommend using the default location "C:\MAMP"
  - Finish and close out of the setup

- Open the **.\flix_and_chill** folder we gave you
  - Copy all of the **contents** of the **.\Site** folder
    - Paste the **contents** in the **.\MAMP\htdocs** folder
  - Copy the .\conf folder from the folder itself
    - Paste the **.\conf** folder into the **.\MAMP** folder
    - It may ask you to overwite files. Just copy and replace them.

- Run the MAMP application
  - Start > All Programs > MAMP > MAMP.exe (Windows)
  - Finder > MAMP > run MAMP (Mac)
  - OR Run the desktop shortcut (Windows and Mac)

- If there is a port problem (**skip if not prompt to change ports**)
  - In MAMP select preferences…
    - Select the Ports tab
      - Apache Port: try 80, 81, 8080, 8081, 8888
      - MySQL Port: try 3306, 8889

- Open your preferred browser to set up the Database
  - Input the URL "localhost:8080/MAMP"
  - Or "localhost:<Apache Port Number>/MAMP" if port was changed
  - Select the Tools dropdown menu
    - Select phpMyAdmin
  - Click **New** near the top left
    - Set database name to "flix_and_chill"
  - Click on the new database called "flix_and_chill"
    - Select the **Import** tab
    - Select **Choose File**, and select the **db.sql** file from the **.\flix_and_chill** folder
    - Now press go at the bottom
      - If met with warning be sure that flix_and_chill database to the left was selected
      - Retry, sometimes the server is slow to respond

- The site should work (if not, contact us)
  - Input the URL "localhost:8080"
  - Or "localhost:<Apache Port Number>" if port was changed
