Developer Setup guide
(Windows)

Macintosh developers & Windows developers who cannot figure it out*
Refer to the Customer Setup guide*

- Open Windows PowerShell
  - Type: Set-ExecutionPolicy RemoteSigned
  - Navigate in PowerShell to the **.\flix_and_chill** folder we gave you
  - Run the **setupScript.ps1**
- Click finished to continue the script
- Script finished
  - MAMP should launch
- Go to import Database at "http://localhost:8080/MAMP"
  - Create a new database called flix_and_chill
  - Select the new flix_and_chill database
  - Select the import tab
    - Choose to upload a file
    - Upload the db.sql file from the **.\flix_and_chill** folder

- The website should be up
  - Go to "http://localhost:8080"
